## Press Release

### **EVTN Invited to Exhibit at Shale Gas Water Management, Marcellus Initiative 2012**

FORT LAUDERDALE, FL.--(PRNewswire) – February 28, 2012 - Enviro Voraxial Technology, Inc. (OTCBB:EVTN) announced today that the Company will display and demonstrate its line of Voraxial<sup>®</sup> Separators at the Shale Gas Water Management, Marcellus Initiative 2012 in Canonsburg, Pennsylvania on March 28-29. The **Shale Gas Water Management, Marcellus Initiative 2012** brings together E&P executives, senior decision makers, technical experts and strategic professionals working in the Marcellus to drive forward solutions at every level of water management from sourcing to reuse to treatment, recycling, transportation, storage and disposal.

In addition to the record revenue levels from the produced water industry, EVTN is also seeing an increase in activity from the domestic frac water industry. "As the pace of Marcellus shale gas production continues to develop at an incredible rate in spite of tightening water disposal regulations, there is increasing pressure on operators to re-use water resources for frac operations. Continually evolving regulations combined with water scarcity and high disposal costs mean operators across the Marcellus are keenly adopting innovative strategies, advanced techniques and cutting edge technologies for water re-use and treatment to reduce the costs associated with managing the water resources that are critical to production," as quoted on the event website, [www.shale-gas-water-management-2012.com](http://www.shale-gas-water-management-2012.com).

With the Voraxial<sup>®</sup> Separator's many unique benefits, including small footprint, low energy requirements, high separation efficiencies, ease of installation and operation and no pressure drop requirement, the operators can achieve efficient separation in a very cost-effective manner. Additionally, since the Voraxial<sup>®</sup> is compact, complete turnkey systems can be supplied to treat a variety of fluid streams to reduce the customers treatment cost and increase the separation efficiency. EVTN continues to pursue the oil & gas industry but is also receiving requests for proposals from other industries such as mining, manufacturing and oil spill industries.

EVTN will display various models of its Voraxial<sup>®</sup> Separator. The Voraxial<sup>®</sup> 4000 generates 2000 "G" Force, and can handle flow rates ranging from 100-500GPM. EVTN will also showcase its Voraxial<sup>®</sup> 2000 Separator (flows ranging from 20-60GPM), and Voraxial<sup>®</sup> 8000 Separator (flows ranging from 1000-4000GPM).

**About Enviro Voraxial Technology:** EVTN is the developer and manufacturer of the Voraxial<sup>®</sup> Separator, a unique, patented in-line turbo-separator that provides a cost effective method to efficiently separate large volumes of solids and liquids with different specific gravities and without the need of a pressure drop. The Voraxial<sup>®</sup> provides highly efficient bulk separation while requiring less space, energy and weight than conventional separators processing the same volume. The Voraxial<sup>®</sup> is capable of simultaneously separating up to three components, such as oil, water and sand. The Voraxial<sup>®</sup> can be used as a stand-alone separator or incorporated with other equipment to provide a complete turnkey solution that allows customers to treat a variety of fluid streams while reducing treatment cost and increasing separation efficiency.

The separation market encompasses a series of multibillion dollar segments, spread globally across many industries and applications. EVTN continues to pursue the oil & gas industry but is also processing proposals from other industries such as mining, food processing, manufacturing and oil spill industries. EVTN owns significant IP surrounding the Voraxial® and has new innovations under development. Please see [www.evtn.com](http://www.evtn.com) for additional information.

**Safe Harbor Disclosure** -- This Press Release contains or incorporates by reference "forward-looking statements," including certain information with respect to plans and strategies of Enviro Voraxial Technology, Inc. For this purpose, any statements regarding this announcement, which are not purely historical, are forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, including Enviro Voraxial Technology, Inc. beliefs, expectations, hopes or intentions regarding the future. All forward-looking statements are made as of the date hereof and based on information available to Enviro Voraxial Technology, Inc. as of such date. There are a number of important factors that could cause actual events or actual results of Enviro Voraxial and its subsidiaries to differ materially from those indicated by such forward-looking statements.
