## **Enviro Voraxial Technology to Demonstrate Voraxial<sup>®</sup> Separator At The Offshore Technology Conference**

FORT LAUDERDALE, FL.--(PRNewswire) – April 29, 2005 - Enviro Voraxial<sup>®</sup> Technology, Inc. (OTCBB:EVTN) announced today that the Company will be an exhibitor in Booth 1232 at the 2005 Offshore Technology Conference, which is being held May 2-5 in Houston, Texas.

“Founded in 1969, the Offshore Technology Conference is the world’s foremost event for the development of offshore resources in the fields of drilling, exploration, production and environmental protection.” For more information, visit [www.otcnet.org](http://www.otcnet.org).

“The Offshore Technology Conference is a good venue for EVTN to discuss the results of our recent testing and the benefits of the Voraxial Separator for the offshore platforms,” said John A. DiBella, Vice President of Enviro Voraxial Technology. “Besides performing a superior separation of crude oil from water, the Voraxial Separator also reduces the space, energy and weight to conduct this separation, making the platform more economical.”

### **About Enviro Voraxial<sup>®</sup> Technology**

Enviro Voraxial<sup>®</sup> Technology, Inc.'s patented Voraxial<sup>®</sup> Separator is a cost-efficient, continuous flow separator that simultaneously separates liquid/liquid, liquid/solid or liquid/liquid/solid mixtures at extremely high flow rates while achieving very high levels of purity. The technological superiority of the Voraxial<sup>®</sup> Separator over conventional technologies is in its ability to produce a real-time, high "g" centrifugal force to yield a high-purity product or products at a volume of 3 gallons per minute to over 10,000 gallons per minute. The Voraxial<sup>®</sup> Separator technology is scaleable and nearly universal in its implementation. Although the Voraxial<sup>®</sup> Separator is applicable to almost any industry separation process, the Company is focusing its near-term efforts in the following five vertical markets: municipal wastewater industry, oil exploration and production, oil refineries, mining, and manufacturing.

EVTN is continuing to market its Voraxial<sup>®</sup> Separator as stand-alone technology as well as a key component to improve the efficiency of self-contained treatment systems for multiple applications.
