ENVIRO VORAXIAL TECHNOLOGY RAISES \$1,451,250 IN PRIVATE PLACEMENT

Proceeds to Provide Capital for Company's Business Strategy in Four Vertical Markets

FORT LAUDERDALE, FL.--(PRNewswire)—August 10, 2004--Enviro Voraxial Technology, Inc. (OTCBB:EVTN), a growing leader in environmental and industrial separation technology, announced today that it has successfully completed its raise of \$1,451,250 in a private placement of its common stock and common stock purchase warrants conducted by Bathgate Capital Partners LLC ("BCP").

Dick Huebner, Senior Managing Partner of BCP, stated, "In our opinion, EVTN is one of the most exciting investment opportunities in which we have participated. The Company is pursuing several multi-billion dollar vertical markets that have a significant need for liquid/liquid and liquid/solid separation, specifically the wastewater and oil & gas markets. Once these markets are penetrated, we believe it should greatly enhance shareholder value. We believe that with the successful completion of testing of the Company's products in the wastewater and oil & gas industries, the Company will have the credibility and capital to execute significant number of equipment sales. We believe that adoption of EVTN's products within the industries identified could lead to tremendous sales growth."

"This funding will enable the Company to deploy and test the Voraxial Separator within the wastewater and oil and gas markets, conduct sales meetings and demonstrations in various vertical markets, build product inventory and execute our sales and marketing plans for the upcoming year," said Alberto DiBella, C.E.O. of Enviro Voraxial Technology. "We are seeing a great response by our potential customers from the testing reports conducted within both the wastewater and oil industry. We are optimistic at the future potential of the Company."

Private Placement Details

The funds were raised through the sale of 1,935,000 shares of the Company's common stock to a group of accredited investors at a per share price of \$0.75. The placement agent for the financing was Bathgate Capital Partners LLC. Investors also received warrants to purchase up to 1,935,000 additional shares of common stock. The warrants have a term of five years and an exercise price of \$1.00. For additional information, please refer to the Company's filings with the Securities and Exchange Commission with respect to this transaction.

About Enviro Voraxial Technology

Enviro Voraxial Technology, Inc.'s patented Voraxial Separator is a cost-efficient, continuous flow separator that simultaneously separates liquid/liquid, liquid/solid and liquid/liquid/solid mixtures at extremely high flow rates while achieving very high levels of purity. The technological superiority of the Voraxial Separator over conventional technologies is in its ability to produce a real-time, high "g" centrifugal force to yield a high purity product or products at a volume of 3 to over 10,000 gallons per minute. The Voraxial Separator technology is scaleable and nearly universal in its implementation. Although the Voraxial Separator is applicable to almost any industry separation process, the Company is focusing its near term efforts in the following 4 vertical markets: municipal wastewater, oil exploration & production, oil refineries, and manufacturing. EVTN has begun the sales and marketing efforts in these markets with 1) the installation of the Voraxial Grit Separator demonstration for the removal of sand & grit at Hillsborough Municipal Wastewater Facility, 2) unit delivery to an oil-service company that performs wastewater treatment for offshore oil production platforms as well as industrial applications and 3) unit delivery to Resource Environmental Group for liquid/liquid and liquid/solid separation at the refineries.

EVTN has and is continuing to develop and market its Voraxial Separator as stand-alone technology as well as incorporate it into self-contained, complete treatment systems for multiple applications.

About Bathgate Capital Partners, LLC

Bathgate Capital Partners LLC is an innovative investment-banking firm headquartered in the Denver suburb of Greenwood Village, Colorado.
