Water Environment Federation Selects Enviro Voraxial® Technology to Discuss Voraxial® Separator at the Technology 2005 Conference

FORT LAUDERDALE, FL.--(PRNewswire)—August 25, 2005--Enviro Voraxial® Technology, Inc. (OTCBB:EVTN) is pleased to announce that Water Environment Federation (WEF) has selected Enviro Voraxial® Technology to be a guest speaker at its upcoming conference. “Technology 2005, 2nd Joint Specialty Conference for Sustainable Management of Water Quality Systems for the 21st Century,” will be held in San Francisco on August 28-31, 2005.

Enviro Voraxial® Technology was selected by WEF because of the efficiencies and economic benefits that the Voraxial® Grit Separator provides to the municipal wastewater industry. The Voraxial® Grit Separator’s efficiency exceeds that of existing technology by greater than 20%. This enhanced separation performance and significant operating cost savings results from: 1) increased efficiency of the grit solids removal, 2) decreased pump and tank maintenance costs, 3) extended time period between tank cleanings, and 4) reduced solids loading in clarifiers and sludge handling facilities.

The performance, benefits and unique design of the Voraxial® Separator have resulted in current discussions with some of the world’s largest corporations regarding licensing, strategic alliances, specialized product development and sales opportunities. The performance of the Voraxial® Separator can be applied in other industries, such as oil and mining, yielding significantly higher efficiencies than existing technologies.

The 2nd Joint Specialty Conference for Sustainable Management of Water Quality Systems for the 21st Century is sponsored by: Water Environment Federation (WEF); European Water Association (EWA); Japan Sewage Works Association (JSWA); and the California Water Environment Association (CWEA).

At this conference, leading engineers and scientists from all over the world will exchange the latest findings and successful case studies highlighting new technologies, novel applications of established technologies, and innovative solutions to historical operational challenges and to emerging issues. The sponsors are particularly interested in providing a forum for sharing information on state-of-the-art practices with potential applications in the United States.

About Enviro Voraxial[®] Technology

Enviro Voraxial[®] Technology, Inc.'s patented Voraxial[®] Separator is a cost-efficient, continuous flow separator that simultaneously separates liquid/liquid, liquid/solid or liquid/liquid/solid mixtures at extremely high flow rates while achieving very high levels of purity. The technological superiority of the Voraxial[®] Separator over conventional technologies is in its ability to produce a real-time, high "g" centrifugal force to yield a high-purity product or products at a volume of 3 gallons per minute to over 10,000 gallons per minute. The Voraxial[®] Separator technology is scaleable and nearly universal in its implementation. Although the Voraxial[®] Separator is applicable to almost any industry separation process, the Company is focusing its near-term efforts in the following five vertical markets: municipal wastewater industry, oil exploration and production, oil refineries, mining, and manufacturing.

EVTN is continuing to develop and market its Voraxial[®] Separator as stand-alone technology as well as a key component to improve the efficiency of self-contained treatment systems for multiple applications.

Safe Harbor Disclosure -- This Press Release contains or incorporates by reference "forward-looking statements," including certain information with respect to plans and strategies of Enviro Voraxial[®] Technology, Inc. For this purpose, any statements regarding this announcement, which are not purely historical, are forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, including Enviro Voraxial[®] Technology, Inc. beliefs, expectations, hopes or intentions regarding the future. All forward-looking statements are made as of the date hereof and based on information available to Enviro Voraxial[®] Technology, Inc. as of such date. There are a number of important factors that could cause actual events or actual results of Enviro Voraxial[®] and its subsidiaries to differ materially from those indicated by such forward-looking statements.
