Enviro Voraxial Technology Demonstrates Voraxial Separator at CLEAN GULF 2003

FORT LAUDERDALE, FL.--(PRNewswire)—Nov. 18, 2003--Enviro Voraxial Technology, Inc. (OTCBB:EVTN) announced today that the Company will be an exhibitor at CLEAN GULF 2003 which is being held November 19-20, 2003 in New Orleans, Louisiana.

The CLEAN GULF 2003 exhibition and conference provides a forum through which professionals from regulatory agencies, the federal government, and the private sector can address the real issues of cooperation, regulation, preparedness, prevention, and response for today's energy industry. Issues from pre-disaster planning through final clean-up and disposal will be addressed at this year's conference.

"We received a good response from the WEFTEC exhibition, and CLEAN GULF 2003 provides us with another opportunity to demonstrate the ability of our unique oil/water separation technology to quickly and affordably separate large volumes of liquid," said Mr. Alberto DiBella, CEO of Enviro Voraxial Technology. "We are in discussions with several companies in different energy related industries that have expressed an interest in evaluating our Voraxial Separators."

EVTN will be exhibiting at Booth 629. For more information, please visit the CLEAN GULF 2003 web site at: www.cleangulf.org.

About Enviro Voraxial Technology

Enviro Voraxial Technology, Inc.'s patented Voraxial Separator is a continuous flow turbo machine that efficiently separates mixtures of fluids or fluids and solids at extremely high flow rates while achieving very high levels of purity. The Voraxial Separator technology is scaleable and nearly universal in its implementation, thus making it applicable to almost any industry separation process. The technological superiority of the Voraxial Separator over conventional technologies is in its ability to produce a real-time, high "g" centrifugal force to yield a high-purity product or products at a volume of 8 to over 1,000,000 gallons per minute. EVTN has and is continuing to develop and market its Voraxial Separator as stand-alone technology as well as incorporating it into self-contained, complete treatment systems for multiple applications.
